Identical Clone

Near-Miss Clone

```
String nameParts[] = author[1].split(" ");  
int i = 0; ←  
for (i = 0; i < nameParts.length; i++) {  
    c = nameParts[i].charAt(0);  
    sb.append(c + ".");  
}
```

```
String nameParts[] = author[1].split(" ");  
int y = 10; ←  
for (i = 0; i < nameParts.length; i++) {  
    c = nameParts[i].charAt(0);  
    sb.append(c + ".");  
}
```

```
String nameParts[] = author[1].split(" ");  
String s = in.readLine(); ←  
for (i = 0; i < nameParts.length; i++) {  
    c = nameParts[i].charAt(0);  
    sb.append(c + ".");  
}
```

Göde's study

“Evolution of Type-1 Clones” (SCAM 2009)

“Irregularities in clone evolution can help to differentiate the potentially harmful from the less interesting clones.”

"Irregularities in clone evolution can help to differentiate the potentially harmful from the less interesting clones."

What about near-miss clones?

- Analyzed 7 subject systems
- 3 programming languages
- 4 year period (daily snapshots)

1. Which clone type has more impact on the clone ratio?

2. Which clone type is more persistent?

Total Number Versions:

3. How frequent do identical clones change into near-miss clones and vice-versa?

	ArgoUML	Ant	JabRef	httpd	Nautilus	FileZilla	Umbrello
Near-Miss to Identical	44	3	8	18	2	5	8
Identical to Near-Miss	19	8	13	29	4	10	8

3. How frequent do identical clones change into near-miss clones and vice-versa?

	ArgoUML	Ant	JabRef	httpd	Nautilus	FileZilla	Umbrello
Near-Miss to Identical	44	3	8	18	2	5	8
Identical to Near-Miss	19	8	13	29	4	10	8

```
if (nameParts.length > 0)
    nameParts[i] = sb + ".";
```

```
if (nameParts.length > 0) {
    nameParts[i] = sb + ".";
}
```

```
if (nameParts.length > 0) {
    nameParts[i] = sb + ".";
}
```

```
if (nameParts.length > 0) {
    nameParts[i] = sb + ".";
}
```

4. Which clone type is changed more frequently (consistently / inconsistently)?
